

PRIVATE AND CONFIDENTIAL

To,
The Director,
Sri Jayadeva Institute of Cardio-vascular Sciences

Dear Sir,

I am a lecturer in Computer science at a university I come for regular heart checkup at your institute.

I am very happy with my experience at your institute. Your staff are very professional and competent and they inspire confidence in me (the patient).

I am very pleased to see that government funding is being used so well, and frankly quite amazed at it. Such a professional and positive environment is not possible without competent and bold leadership, so I congratulate you for this!

My very best wishes,

Shishir Nagaraja

Subject: Whole-hearted thanks for helping Enamul Mazid, patient from Bangladesh
Dear Dr. Manjunath,

Greetings. This is Naqib, writing to you from Johns Hopkins School of Medicine, Baltimore.

I would like to express my whole-hearted gratitude to you, all the staff of Jayadeva hospital, Dr. Jayprakash and his team, and Mr. Subramaniam and his colleague for taking care of Mr. Enamul Mazid Jewel. I learned that he is back to Bangladesh and doing well. Enamul and his family members remain ever grateful for the medical care and humanitarian gesture, you all have shown to him. Following his successful defibrillator implantation, you have waived his hospital bills as well. No words are good enough to thank you for the act of kindness.

I wish you and your family all the best.

Kind regards,
Naqib

Subject: Pediatric Cardiology

Dear Dr. Manjunath:

I happen to be in Bangalore visiting my aging parents and recently read about the remarkable institution that Sri Jayadeva Institute has become. In the years gone by you have built an incredible institution and the statistics of procedures performed are simply astounding. I greatly admire you for what you have achieved on every front in the field of cardiology.

I did my medical schooling from JIPMER, Pondicherry and then spent 10 yrs in the UK training in various hospitals including 5 yrs at Guy's Hospital in London training in pediatric cardiac MRI and interventional MRI. I recently also completed a fellowship in pediatric cardiology from UCSD in San Diego, USA. I have a tentative job offer from UCSD for the position of Asst. Professor which I have accepted. I wanted to delay my joining UCSD to July 2013 so as to be able to gain some experience in India.

It would be a great privilege for me to work at Sri Jayadeva Institute in the capacity of a visiting physician to gain some additional experience in transthoracic echocardiograms and interventional cardiology to supplement my experience thus far. I've attached my CV to this email which details my education and training. I would be extremely grateful for an opportunity to spend sometime in your institution.

Thanks very much.

Kind regards,
Sanjeet

Subject: Re: Training Opportunity

Dear Dr Manjunath,

Thank you for giving me an opportunity to come to Sri Jayadeva Institute of Cardiology. I had pleasure working with all the staff including physicians, fellows, and cath lab staff. I would like to thank specifically Drs. B. C. Srinivas, Prabhavathi, Vijayalakshmi, Ramesh, Raghu, K.H. Srinivas, Nagesh, Reddy, Satish, Patil and Mohan. I had tremendous amount of knowledge gain and hands on experience to improve my patient care and cath lab skills specifically in the treatment of structural heart disease.

I had a first hand experience that Sri Jayadeva Institute of Cardiology functions at a very high level of patient care, procedural and operative skills as a premiere academic institute not only in the country but at an International standard. I feel honored that I could be a part of your cath lab team and was able to take part in the procedures. Hopefully, in future, if time allows, I would love to experience such an opportunity again. Also, I will be eager to join any of your future workshop and share my limited knowledge, expertise and procedural skills.

I have my contact information in the USA in this email. At anytime, please provide me an opportunity if I could be of any help to you, any of your staff members or to your institution.

Thank you again for everything.
