

LIBRARY

Introduction :

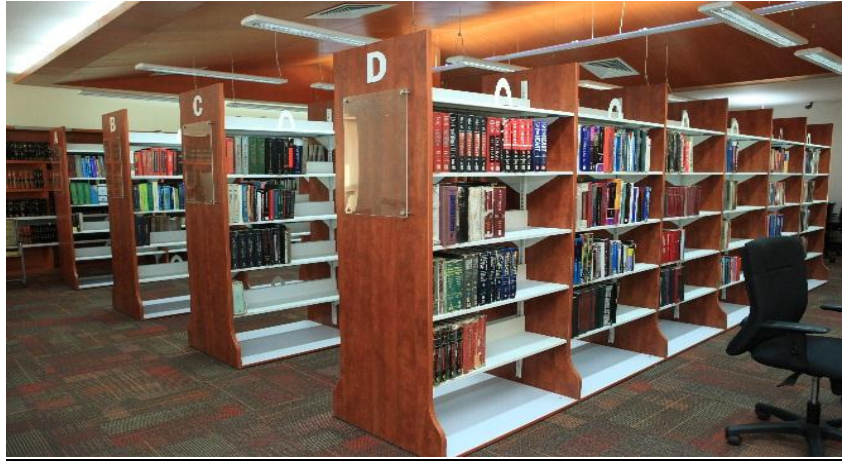

Medical Library is located in the First floor of Administrative Block which is one of the repository of medical knowledge and an integral part of the Institution. It is rich in its collection, starting with the closed-access of earlier times to the present-day hybrid, digital and Electronic Library that use the latest technology for provision of information through various services. With dedicated Library staff, the library is providing the medical user community with the right medical information at right time. The library has developed the resources and collection that is required for the student community of the Institution.

The Digital library facility was fully established during 2006. The Library has its own Internet connection and E-Mail facilities catering to the needs of the faculty members and students. The library provides E-Journals and E-Books facility through HELINET Consortium provided by RGUHS on payment of annual subscription.

Library Building:

Library has 3500 Sq. ft. of floor area with provision for textbooks section, reference section, stock area, back volume area, periodical section, reprographic section, computer workstation with internet facility to access e-resources, newspaper reading room and Librarian work station.
