

## **HOSPITAL PROCEDURAL CHARGES**

We are committed to share the information about our individual procedural charges for various cardiac healthcare services provided at our Institute.

During the time of admission, the Patient Coordinators will inform and coordinate regarding the Scheme available and the payment aspect for the required procedure. Also we will explain the Patient Attendant's about the treatment expenses and also regarding the billing details at the time of discharge.

Under Insurance category, there will be some co-payments to be borne by the Patient for the services not covered under Insurance scheme, which will be intimated in advance to the Patient Attendants. Further for any more clarification or information, the Concerned Insurance Coordinators will guide.

The final billing will be done on the day of discharge. If patient stays more than a week, the billing will be done daily and will be intimated to the Attendants about the payment. The final bill will clearly state the services provided to the patient along with the details of procedure undergone. It also depicts the actual expenditure and the payment made to the hospital.

However, if any poor or needy patient needs financial assistance, can approach the higher authorities viz., Director / Medical Superintendent / Chief Administrative Officer or Financial Advisor for concession / discount in the hospital bill.

**For any Billing Inquiries, can contact: 080-22977232**

### **Financial Counseling**

**The Concerned Unit Doctors will issue estimation for the required Procedure / Surgery.**

**The Ward Coordinators will guide the patients regarding the availability of various schemes towards their treatment. They will also coordinate in clearing the discharge files based on their financial affordability.**
